

Colors Screen Creation using Nodes

Create index.html, css/style.css, js/script.js

Below is the index.html file; it should only have a link to the css and a link to the js file. The css can be mainly type selectors, for ease.

Please create all of the screen information below using JavaScript. There is a script.txt file that provides the instructions for initial functionality.

127.0.0.1:5500

ITC Moodle GitLab Richland County, SC... Adobe Acrobat
